

Job Description

Job Title: Project Manager/ Sr. Project Manager

Department: Projects

Location: Bangalore

Reporting To: Project Head

Job Purpose

The Project Manager – Execution will be responsible for end-to-end project delivery, ensuring timely completion, cost efficiency, site readiness, vendor coordination, and compliance with statutory and safety requirements. The role demands strong execution capability, cross-functional coordination, and adherence to defined project KPIs.

Roles & Responsibilities

1. Timely Project Delivery

- Ensure project commissioning on or before defined deadlines
- Monitor project timelines and proactively mitigate delays
- Track progress based on MW delivery targets
- Coordinate with internal and external stakeholders to resolve execution challenges
- Adjust timelines considering approved client-related delays

2. Budget Adherence

- Ensure project execution within the approved budget
- Monitor cost variance between planned and actual expenses
- Optimize costs without compromising quality and timelines
- Work closely with finance and procurement teams for cost control
- Ensure adherence to the latest approved project budget

3. Site Readiness & Handover

- Ensure all sites are fully prepared for commissioning
- Oversee documentation and ensure proper handover within 30 days of commissioning
- Coordinate with site teams to maintain readiness standards
- Ensure all required reports and documentation are complete and accurate

4. Vendor / Contractor Coordination

- Manage vendors and contractors for timely material delivery and execution
- Ensure critical path materials are delivered without delays
- Monitor vendor performance and address issues proactively
- Collaborate with the procurement team for efficient vendor management

5. Approvals & Compliance

- Ensure timely completion of all statutory approvals
- Coordinate with liaisoning teams for regulatory clearances
- Ensure all safety audits are conducted and passed as per standards
- Maintain compliance with project timelines and regulatory requirements

6. Liaisoning & Audit Support

- Track approval timelines and ensure adherence
- Support safety and compliance audits
- Ensure audit readiness and 100% compliance where required
- Maintain proper documentation for approvals and audits

Qualifications & Experience

- Bachelor's degree in Engineering (Electrical / Mechanical / Civil preferred)
- 5+ years of experience in project execution (Renewable Energy / Infrastructure preferred)
- Proven experience in managing end-to-end project lifecycle

Key Skills Required

- Project planning & execution
- Cost control & budget management
- Vendor & stakeholder management
- Strong communication & coordination skills
- Knowledge of statutory approvals & compliance
- Problem-solving and decision-making ability

**Preferred Industry Experience**

- Solar / Wind / Renewable Energy Projects
- Infrastructure / EPC Projects
