

Integrum Energy Infrastructure Limited

Facilities/Instruments	Name of the Regulator ¹	Amount (₹ crore)	Rating ²	Rating Action
Long-term bank facilities	RBI	14.00	CARE BBB; Stable	Upgraded from CARE BBB-; Stable
Short-term bank facilities	RBI	143.50	CARE BBB; Stable / CARE A3+	Upgraded from CARE BBB-; Stable / CARE A3
Non-convertible debentures	RBI	2.00	CARE A3+	Upgraded from CARE A3

Details of instruments/facilities in Annexure-1.

Borrowing Programme: The rated instrument may involve issuance of different instruments such as debt securities (listed or otherwise), bank loans, commercial paper (listed or otherwise), etc. The regulator of the instrument may accordingly be SEBI, RBI or MCA and can only be determined upon issuance. In the rating reports subsequent to issuance(s), CARE Ratings Limited shall separately capture the rated quantum details along with names of respective regulators.

Rationale and key rating drivers

Revision in ratings assigned to Integrum Energy Infrastructure Limited (IEIL) reflects the company's significant improvement in scale, driven by timely execution of large projects. CARE Ratings Limited (CareEdge Ratings) expects IEIL's revenue growth momentum to continue, supported by a healthy order book and sustained operating margins. Ratings also derive strength from promoters' established track record in the renewable energy sector, which has enabled the company to secure sizeable orders from reputed counterparties.

Ratings further benefit from the company's relatively low dependence on external debt. However, its capital structure remains moderately leveraged due to higher receivables from certain central public sector undertaking (CPSU)-backed projects, which are financed through trade creditors. Despite this, improved profitability has strengthened the company's debt coverage indicators. Continued timely realisation of receivables from ongoing projects will remain critical in maintaining low reliance on external borrowings and supporting execution of future projects.

Ratings continue to be constrained by working capital intensive business, intense competition in the industry, and exposure of profit margins to fluctuations in input costs.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors

- Timely execution of its orders on hand, resulting in total operating income (TOI) of ₹1,000 crore on a sustained basis while maintaining profit before interest, lease rentals, depreciation, and taxation (PBILDT) above 12%.

Negative factors

- Delay in order execution, resulting in dip in PBILDT margins below 9%.
- Total outside liabilities to tangible net worth (TOL/TNW) beyond 3.5x on a sustained basis or deterioration in liquidity profile.

Analytical approach: Consolidated

CareEdge Ratings has considered consolidated financials of IEIL including all its subsidiaries as on March 31, 2026, to assess IEIL. List of entities consolidated are mentioned at Annexure-5.

¹SEBI: Securities and Exchange Board of India; RBI: Reserve Bank of India; MCA: Ministry of Corporate Affairs; IRDAI: Insurance Regulatory and Development Authority of India; PFRDA: Pension Fund Regulatory and Development Authority

²Complete definitions of the ratings assigned are available at www.careratings.com and in other CARE Ratings Limited's publications.

Outlook: Stable

CareEdge Ratings expects the company to sustain its improved scale of operations, supported by a healthy order book, and to continue securing orders regularly based on the promoter's extensive experience in the industry.

Detailed description of key rating drivers**Experienced promoters**

IEIL incorporated on February 26, 2021, is promoted by Anand Lahoti and Puneet Goel, who actively oversee its operations. Promoters bring decades of experience in the renewable energy sector, Lahoti in the past led equity investment, driven group captive model, while Goel has 25 years of expertise in consulting, financing, product development, and scaling energy businesses. Under their leadership, IEIL secured substantial orders in its first year and has consistently maintained satisfactory order book. IEIL serves leading corporates across sectors, including pharma, chemical, and steel, among others, and receives repeated orders from existing clients.

Timely execution of orders supported significant revenue growth

The company reported strong revenue growth in FY26, with operating income increasing by ~4.9x in FY25, driven by a healthy order book and timely execution of high-value projects. The company maintained a stable operating profitability margin of ~13%. As on March 31, 2026, IEIL had a robust order book of ₹1,138 crore, providing healthy revenue visibility for FY27. The company's ability to continue securing sizeable new orders while sustaining its operating profitability and execution efficiency will remain a key monitorable from a credit perspective.

Satisfactory debt coverage indicators

The company maintains a satisfactory capital structure and interest coverage, aided by minimal reliance on external debt. The company's TOL/TNW improved marginally from 2.07x as on March 31, 2025, to 1.95x as on March 31, 2026, supported by an increase in profitability and equity raise by the company in FY26.

CareEdge Ratings estimates that with growing scale of operations, the company's working capital requirement would increase, which would keep TOL/TNW at similar levels. However, successful raise of funds through planned initial public offering (IPO) may improve capital structure significantly.

Growing order book position

The company's order book position stands healthy at ₹1,138 crore as on March 31, 2026 (June 30, 2025: ₹551 crore), with top three orders comprise ~74% of total order book. All counterparties have above-average-to-strong credit profile. The company's majority projects are backed by letter of credit (LC) from customers, which mitigates counterparty credit risk to a large extent. As part of order procurement strategy, the company identifies the land parcel in advance, which are preferably near the substation, which reduces time for land-related approvals and right of way issues. The company also offers value-added services, such as design and installation of customised standalone and hybrid wind-solar systems on end-to-end basis, asset management for monitoring and maintaining energy assets over their life cycle, advanced analytics for energy sourcing optimisation aligned with customer's load profiles. The company's ability to maintain satisfactory order book/ sales ratio over the period would be key to its credit profile.

Order Book Movement

For the period ended March 31,	FY22	FY23	FY24	FY25	FY26
Opening Order in hand	-	19.34	77.19	40.01	234.45
Orders added during the year	183.15	139.85	190.29	310.24	1482.60
Gross billing	163.81	82.00	227.47	115.7	691.25
Closing orders in hand	19.34	77.19	40.01	234.56	1025.80

Source: Company's MIS

Working capital intensive operations

Given the nature of its operations, which involve milestone-based customer payments and project execution timelines of ~3–6 months for solar power projects and 12–15 months for wind power projects, IEIL's operations remain working capital intensive, primarily requiring non-fund-based facilities for issuance of letters of credit and

bank guarantees to suppliers and customers. The company's average gross current asset cycle stood at 211 days in FY26, mainly due to elevated receivables outstanding at year-end.

That said, IEIL has demonstrated an ability to manage its working capital cycle through favourable back-to-back credit terms from suppliers, particularly in large-scale CPSU-backed projects. This has supported its liquidity position and enabled the company to maintain relatively low reliance on external borrowings for project execution. As on March 31, 2026, the company had sanctioned non-fund-based working capital limits of ₹153.50 crore, with average utilisation remaining moderate at ~72%, despite execution of several large orders during the year.

With the expected growth in the order book and scale of operations, IEIL's working capital requirements are likely to increase over the near-to-medium term. However, continued access to supplier credit, timely milestone collections from customers, and disciplined utilisation of working capital limits are expected to remain important liquidity-supporting factors. The company's ability to execute projects within stipulated timelines while maintaining adequate liquidity and prudent utilisation of working capital facilities will remain a key rating monitorable.

Intense competition and profitability susceptible to price volatility

IEIL operates in the competitive renewable energy engineering, procurement, and construction (EPC) sector alongside several established industry participants. The company has differentiated itself through its integrated capabilities across solar and wind EPC projects, hybrid renewable energy solutions, strategic site selection expertise, and a strong track record of execution. These capabilities enable IEIL to participate in a wider range of projects and strengthen its competitive positioning in the rapidly expanding renewable energy market.

EPC contracts are typically awarded on a fixed price and do not include price escalation provisions, but IEIL has put in place risk mitigation measures to protect profitability. The company uses a disciplined back-to-back procurement strategy for major raw materials at predetermined prices, which significantly reduces exposure to commodity price fluctuations. The short project cycle and the practice of securing advance payments for most contracts help maintain cash flow and reduce execution and pricing risks.

Cost structure

Costs as percentage of Sales	FY23 (A)	FY24 (A)	FY25 (A)	FY26(UA)
Cost of Materials	61.81	65.69	53.11	74.07
Emp. Expenses	3.15	1.97	5.36	1.37
Power and Fuel	0.26	0.41	0.30	0.07
Manufacturing and Other expense	28.34	25.27	26.19	11.13
Selling Expense	0.35	0.32	0.45	0.27
PBILDT %	6.09%	6.34%	14.59%	13.09%

Liquidity: Adequate

The company's liquidity is driven by the order book primarily from counterparties, having above-average credit profile, which ensures timely receipt of milestone payments. The company has a free cash and bank balance of ₹48.39 crore (including ₹30 crore lien marked against BG/LC). The company has sufficient cushion in non-fund-based limits to provide BGs/LC to receive and execute new orders. The company has low term debt and unutilised non-fund-based limits were ~₹42 crore as on March 31, 2026.
